

SERVICE OVERVIEW

OpenText Core Archive for SAP Solutions OnBoarding FasTrak

Speed, simplify and enhance onboarding OpenText™ Core Archive for SAP® Solutions

 **Go live faster**

 **Minimize** business disruption

 **Leverage** full-service integration

 **Trust** the experts

Business documents are the foundation of business-relevant transactions in any SAP® system. Many organizations require a scalable, regulatory compliant, secure and reliable repository for retention of digital business documents over many years. Additionally, organizations face increasing pressure to improve, simplify and reduce the cost of IT by using Software-as-a-Service solutions.

Customers can quickly benefit from integrating with OpenText™ Core Archive for SAP® Solutions—a solution meeting all of those requirements. OpenText Professional Services delivers this integration to an existing SAP system with this OnBoarding FasTrak engagement.

Go live faster

The Core Archive OnBoarding FasTrak follows a proven methodology to help customers go live rapidly, incorporating learnings and experiences from a vast amount of customer projects. As a result, users will be able to archive SAP documents into the new OpenText Core Archive Cloud Service quickly.

Minimize business disruption

Customers can benefit from years of experience and intellectual property unique to OpenText, the vendor of the software. The OpenText design patterns and implementation approach make for a faster, more predictable implementation with less disruption to business.

Moving OpenText™ Archive Server into the OpenText™ Content Cloud without disrupting business users.

"A key area for us was the migration of our existing content, around 27 TB. OpenText was able to clearly show us how the migration could be achieved, with no negative impact on our day-to-day business activities."

– Joris Verberckmoes
Head of Delivery and Operations
Engie Electrabel

Leverage full-service integration

The first part of the FasTrak engagement is a cloud readiness workshop, which introduces the Core Archive for SAP Solutions concept. During this remote workshop, OpenText configures an organization's system landscape, SAP archiving use cases and scenarios.

Next, the Core Archive Connector software is installed and securely connected to OpenText Core Archive for SAP Solutions Cloud Service, as well as SAP systems, following the plan from the workshop.

Initial deployment of OpenText client software, such as Imaging Viewer and Imaging Enterprise Scan, provides enhanced functionality for SAP archiving scenarios. OpenText will install each of these components once to provide administrators with a reference installation for tests and client-software rollout.

Trust the experts

Leverage more than two decades of experience integrating information management solutions with SAP. OpenText Professional Services brings leading practices and lessons learned to guide the team, simplify the design and maximize the business potential from the Core Archive Connector investment.

Have confidence in a path to content that enables SAP managed business. OpenText experts drive down risk by leveraging their extensive SAP document business process and solution knowledge. As the product vendor, OpenText delivers as one team. Organizations benefit from experts across the company with shared mutual accountability for customer success and satisfaction.

OpenText Professional Services is a global organization with more than 3,000 product-certified members exclusively focused on enterprise information management (EIM) solutions.
